

Kafka Advanced Master Pack (Spring Boot + Interview + System Design)

Spring Boot + Kafka Producer

```
@RestController public class ProducerController { @Autowired KafkaTemplate kafkaTemplate;  
@PostMapping('/send') public String send(@RequestParam String msg){ kafkaTemplate.send("topic",  
msg); return "Sent"; } }
```

Spring Boot + Kafka Consumer

```
@KafkaListener(topics="topic", groupId="grp") public void consume(String msg){  
System.out.println(msg); }
```

Configuration

```
spring.kafka.bootstrap-servers=localhost:9092 spring.kafka.consumer.group-id=grp
```

Interview Question 1

Explain Kafka concept 1 with producer, consumer, partition, offset.

Interview Question 2

Explain Kafka concept 2 with producer, consumer, partition, offset.

Interview Question 3

Explain Kafka concept 3 with producer, consumer, partition, offset.

Interview Question 4

Explain Kafka concept 4 with producer, consumer, partition, offset.

Interview Question 5

Explain Kafka concept 5 with producer, consumer, partition, offset.

Interview Question 6

Explain Kafka concept 6 with producer, consumer, partition, offset.

Interview Question 7

Explain Kafka concept 7 with producer, consumer, partition, offset.

Interview Question 8

Explain Kafka concept 8 with producer, consumer, partition, offset.

Interview Question 9

Explain Kafka concept 9 with producer, consumer, partition, offset.

Interview Question 10

Explain Kafka concept 10 with producer, consumer, partition, offset.

Interview Question 11

Explain Kafka concept 11 with producer, consumer, partition, offset.

Interview Question 12

Explain Kafka concept 12 with producer, consumer, partition, offset.

Interview Question 13

Explain Kafka concept 13 with producer, consumer, partition, offset.

Interview Question 14

Explain Kafka concept 14 with producer, consumer, partition, offset.

Interview Question 15

Explain Kafka concept 15 with producer, consumer, partition, offset.

Interview Question 16

Explain Kafka concept 16 with producer, consumer, partition, offset.

Interview Question 17

Explain Kafka concept 17 with producer, consumer, partition, offset.

Interview Question 18

Explain Kafka concept 18 with producer, consumer, partition, offset.

Interview Question 19

Explain Kafka concept 19 with producer, consumer, partition, offset.

Interview Question 20

Explain Kafka concept 20 with producer, consumer, partition, offset.

Uber Architecture (Kafka)

Driver location updates -> Kafka -> Real-time matching service -> Rider notification.

Swiggy Architecture (Kafka)

Order placed -> Kafka topic -> Restaurant + Delivery service -> Notifications.
